

# Families and Hearing Study

*Help us learn more about the contribution of family environment to developmental outcomes in children*

- Who:** Families of children age 3-8 years, who have an English-speaking parent and who:
- wear hearing aids or cochlear implants  
OR
  - have typical hearing and language development

**What:** Questionnaires, games and exercises involving language and thinking

**Where:** In your home with two clinical researchers from Ohio State University

**When:** 3 sessions over the next 2 years, at your convenience

**Participants receive up to \$625 in gift cards!**
